MOVYIS3

ENJOY SEATING PERFORMANCE.

A modern office interior featuring a curved glass wall that separates a workspace from a meeting room. In the foreground, there are white desks with computer monitors and blue and white ergonomic chairs. A prominent red pillar is on the left. The background shows a meeting room with a long white table, white chairs, and red pendant lights. The overall design is clean, bright, and professional.

**EYE-CATCHING
DESIGN.
IDEAL TECHNOLOGY.**

Good design begins where your whole body becomes aware of it: the MOVY^{IS3} product range combines design and aesthetics with form and function on a completely new level. Light, dynamic, distinctive; MOVY^{IS3} stands for visible weightlessness, transparency and an emphasis on aesthetics that enhances your workplace and living space. Give the extraordinary a permanent place among your office furniture. Make a statement – simply in seating.

FORM. FUNCTION.
PERFECTLY SHAPED.

People who make big things happen every day are entitled to expect top performance from others – and MOVY^{IS3} confidently delivers that performance in terms of design and function in equal measure. The comfort it provides completely redefines the notion of sitting. Regardless whether you choose the swivel armchair with comfort upholstery or the conference chair – MOVY^{IS3} puts itself completely at the service of your wellbeing, and gives a boost to your highest intellectual endeavours.

A SEAT TO SUIT.

Every person is unique and has his or her own individual taste.

And yet MOVY^{IS3} fits everybody. Not only because its functionality meets all the most diverse requirements, but also because it fulfils everyone's wishes in terms of appearance. With the large variety of upholstery fabrics and colours, as well as different backrests and armrests, you can devise a completely individual design. In addition to this, you have the option of cantilevers, four-leg versions, conference chairs, swivel armchairs and swivel chairs, and two colour options for the frame. So every single version of this chair is a work of art.

You will find more design variations at [interstuhl.com/movy](https://www.interstuhl.com/movy)

READJUST YOUR VIEW OF PERFECTION.

Particularly large opening angle: lowering the backrest by means of the autolift system ensures comfort and relaxation. And the sensation of comfort is enhanced even further by a gentle stop at the final position of the backrest.

T-armrests (height-adjustable)

3D T-armrests (height and width-adjustable, can be swivelled)

3D T-armrests (height, width and depth-adjustable)

Armrests: optional adjustable armrests are comfortable and relieve strain on arms and shoulders.

Lumbar support in the mesh: can be pushed up and down and shifted concentrically. This also alters the depth. The lumbar support strengthens the back where support is most needed.

Seat depth adjustment: ensures the right thigh support to suit the height of the user.

Seat inclination adjustment: this allows the angle of the seat to adjust quickly and simply to the working position. A very ergonomic feature is the way just the front area lowers.

Lumbar support in upholstery of backrest: you can regulate the height by means of a slider positioned on the right side underneath the backrest. The depth of the lumbar support is altered by means of the handwheel.

Synchronous mechanism with weight regulation: the return force adjustment of the synchronous movement allows it to adapt to body weight in seven stages.

State-of-the-art mechanism with autolift system: the return force of the synchronous movement with fine-tuning of the backrest counterpressure adapts automatically to the weight of the body.

Sustainability:

Environmentally friendly production and ecologically sound products are trademarks of Interstuhl. Both aspects have been meticulously taken into account in the development of MOVY^{IS3}. Interstuhl's environmental management meets the requirements of DIN EN ISO 14001. Total Quality Management has been certified in accordance with DIN EN ISO 9001 since 1993.

Up to 98% recyclable materials are used during the continuously environmentally-friendly production process, including a high proportion of natural materials. MOVY^{IS3} has a post-consumer recycled content of 26.9% and a pre-consumer recycled content of 10.6%. It is for good reason that the product range has been awarded the "Blue Angel", and that Interstuhl was one of the first companies in the industry to receive EMAS certification in 1995.

Joachim Brüske

Andreas Krob

Product design:

MOVY^{IS3} was designed and created by Joachim Brüske and the industrial designer Andreas Krob.

Together with his wife Uta Krob, Andreas Krob founded Büro B4K in 2001. Both of them are dedicated to working on innovative solutions for challenging assignments in the fields of design and architecture. Their furniture is characterised by an individual stylistic idiom and a unique personality.

Talking about MOVY^{IS3}, Joachim Brüske and Andreas Krob comment that they have created “an office chair that combines a superb level of comfort with a visible weightlessness and transparency.”
